

DYNAMO DB TASK

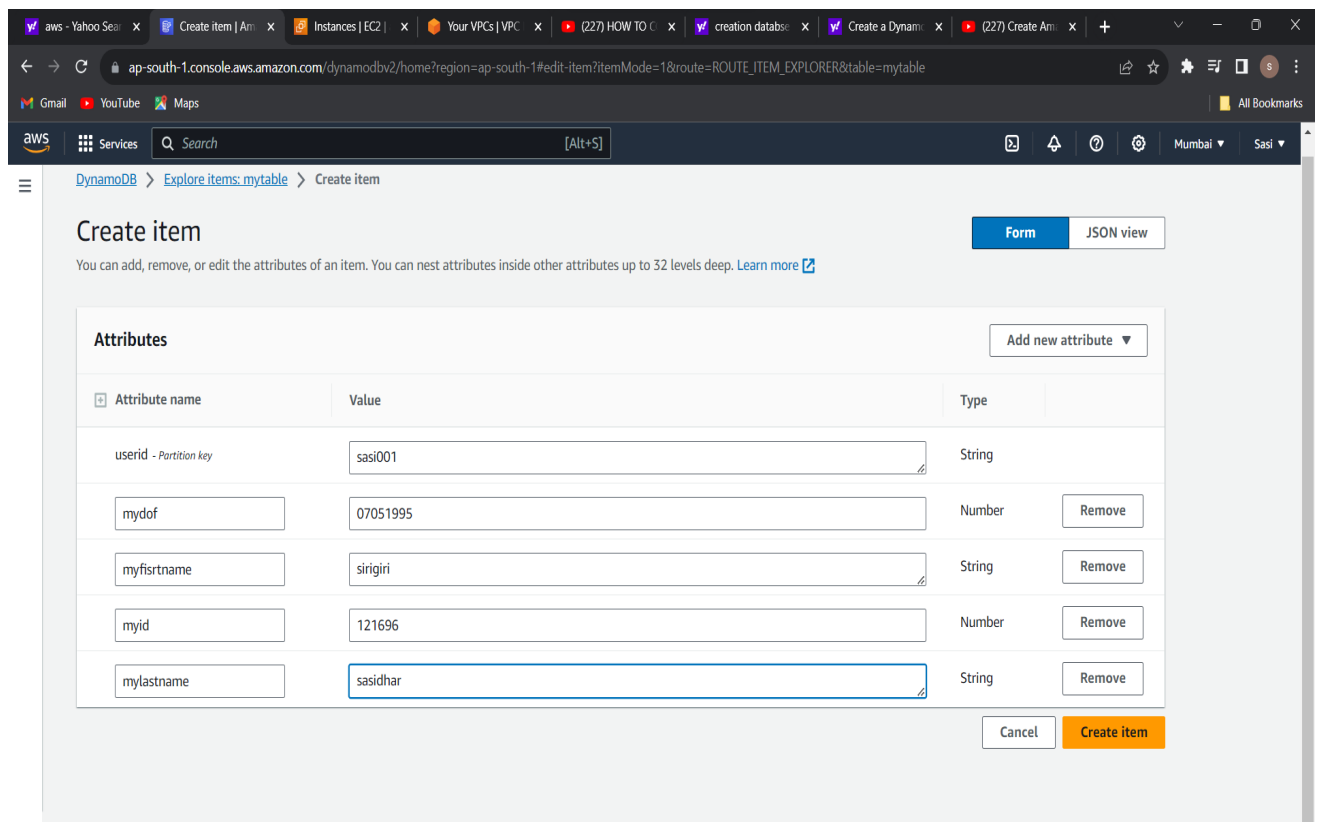

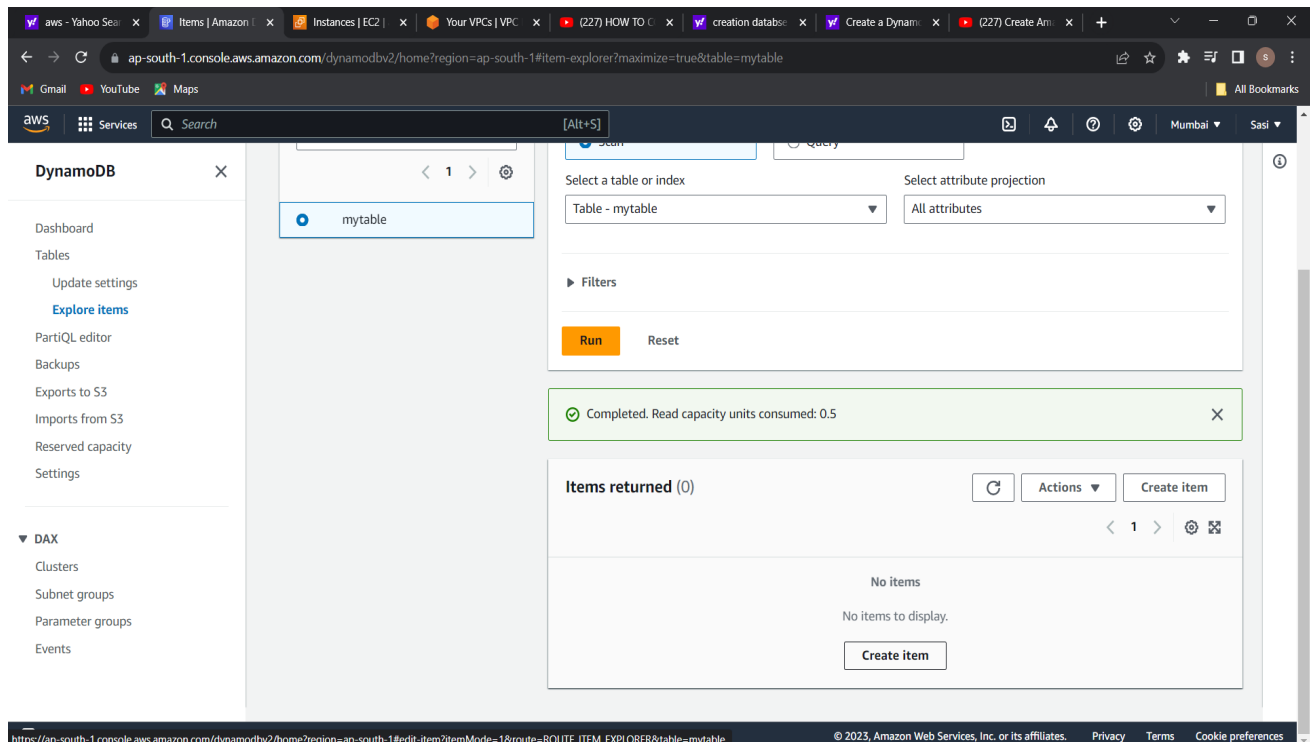

Problem Statement: You work for XYZ Corporation. Their application requires a database service that can store data which can be retrieved if required.

Implement a suitable service for the same. While migrating, you are asked to perform the following tasks:

1. Create a DynamoDB table with partition key as ID.
2. Add 5 items to the DynamoDB table.
3. Take backup and delete the table

aws - Yahoo Search x Items | Amazon | x Instances | EC2 | x Your VPCs | VPC | x (227) HOW TO C x creation databas x Create a Dynam x (227) Create x +
